ACCENT PLASTIC STRAPPING SYSTEM

DESIGNED FOR TWO-RAM BALERS

FEATURES & BENEFITS

- All-steel track system mounted on frame, custom-sized for the baler
- Flexibility of polyester or polypropylene plastic strapping
- Thermo-electrical heat seal with digital temperature control
- Reliable and proven plastic strapping head that only requires a planned system service visit every 200,000 cycles
- Can be coupled with the Accent 470® Wire Tier for flexible options of baling RDF and recyclables

The Accent Plastic Strapping System features a proven strapping head for heavy duty applications that are in service at over 10,000 industrial installations worldwide
